

Rapid Screening Breathalyzer

AT7600 Professional Breathalyzer

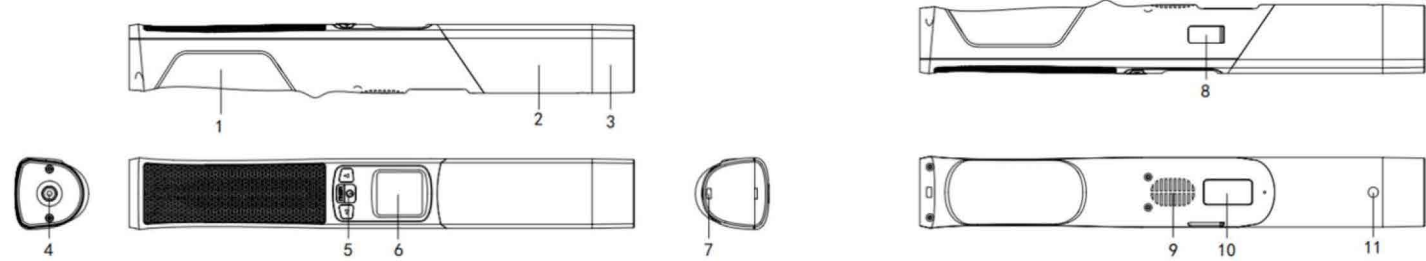

AT7600 using advanced platinum fuel cell sensor to offer quick and accurate testing result in testing human breath, and its' passive & active testing modes provide various inspections under different situation. Highly recommended!

APPLICATION

Mainly used in pre-work, road safety checking and etc.

FEATURE

- Fuel cell sensor, high accuracy and stability
- Active test & passive test
- Data updating, Bluetooth printer as option
- Rechargeable battery, USB Type-C port
- LCD & Traffic baton & lighting function
- Supporting test result printed and data uploading to computer
- Supporting no mouthpiece needed, environmental and hygiene friendly
- Adjustable of blowing time & alarm point & measurement units
- Supporting languages of English, Spanish, Portuguese and Polish

1	Anti slip handle	7	Hanging rope hole
2	Flasher	8	USB-Type C
3	Air inflow port	9	Bullhorn hole
4	Air inlet	10	Lighter
5	Button	11	Air outlet
6	Screen		

SPECIFICATIONS

Model	AT7600
Sensor	Platinum Fuel Cell
Testing Range	0 ~ 2.000mg/L
Accuracy	±0.02mg/L @ 0.244mg/L
Battery	Lithium rechargeable battery
Charging time	About 4-6 hours
Charging condition	Output voltage 5V±0.5V, output current≥1A
Blowing time	0.5s/1s/2s/3s/4s adjustable
Working time (Full charge)	7000-10,000 tests (consecutive blowing) 10-15 hours using (consecutive using)
Dimension	300mm*42.3mm*43.5mm(L*W*H)
Weight	280g
Calibration	180 days (recommended)
Preheating time	Within 10 seconds
Records	20,000 records (Over 20,000 records, the latest record will overwrite the first record)
